1. This office action, in response to the remarks filed 4/10/2007, is a final office action.

Response to Arguments

- 2. The previous objections to the drawings and specification are withdrawn in view of the amendment.
- 3. Applicant's arguments filed 4/10/2007 have been fully considered but they are not persuasive. Regarding claim 1, applicant states Lebizay does not disclose the limitation stated in the performing a statistical analysis step. The examiner disagrees. As stated in the previous office action, Lebizay discloses transmitting a control packet, which provides the receiving side with a repetitive pattern value in column 2, lines 23-31. Lebizay discloses the repetitive pattern is detected, regenerated and inserted in the output sample stream (column 2, lines 11-15). To detect a repetitive pattern, each bit of the pattern is detected. Each bit will be properly detected or not and when a majority (all) of the bits are detected properly, the pattern will be detected. Therefore, a "majority vote of the state for each bit of the channel" is determined. Each state of the bit will be correct or not. This analysis of the bits is the statistical analysis. For this reason, the rejection of claim is maintained. Regarding claim 7, Lebizay discloses a data transmission system comprising a compressor and decompressor as well as the limitations stated above. In addition, MPEP 2111.04 discloses claim scope is not limited by claim language that suggests or makes optional but does not limit a claim to a

particular structure. An example of claim language that may raise a question to the limiting effect of the claim language in a claim is adapted to clauses.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Lebizay et al (US 6,144,658).

Regarding claim 1, Lebizay discloses a method and apparatus for digital data compression. Data is separated into frames comprising bits and corresponding time slots. Data is transmitted from a transmitter to a receiver. The data will be transmitted until a repetitive pattern is detected (column 2, lines 8-22). Therefore, the content of the channel will be transmitted after the channel has gone to a static state but before the static state has been detected. After detection of the repetitive pattern in the receiver side, a control packet (descriptor) provides the receiver side with the repetitive pattern value (column 2, lines 23-31). Analysis of the received signal is done at the receiver and the repetitive pattern is regenerated and inserted in the output sample stream (column 2, lines 13-15).

Regarding claim 7, Lebizay discloses a data transmission system comprising a compressor and decompressor as shown in figure 1 and described in column 3, line 58 Art Unit: 2611

to column 4, line 51. This apparatus can be adapted to implement any method of data compression and decompression using the compressor and decompressor.

Allowable Subject Matter

5. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin M. Burd whose telephone number is (571) 272-3008. The examiner can normally be reached on Monday - Friday 9 am - 5 pm.
